ENVIRONMENTAL POLICY

As a company, we ensure full compliance with national and international legal requirements in all of our activities. We provide our products and services through the use of continuous improvement tools and appropriate technologies.

Our commitment is to leave a clean and livable world for future generations with our sustainable environmental approach.

- We adhere to current laws and regulations by monitoring environmental publications.
- We work towards the transmission of a sensitive, clean, and healthy environment to future generations in the face of climate change.
- We keep environmental pollution under control by minimizing it through the principle of prevention at the source, in conjunction with the environmental management system.
- With the understanding that our environment is entrusted to us, we reduce natural resource usage, prevent pollution, dispose of waste properly, and promote efficient energy use.
- We direct environmental activities to support other policy elements.
- We commit to raising environmental awareness among our employees, stakeholders, and the community by effectively implementing integrated management systems and mobilizing resources and capabilities.
